**Press Release****GOVECS and Einhell launch the E-Kickscooter with Power X-Change**

- GOVECS and Einhell combine core competencies and present innovative e-kickscooter
- Integration in Power X-Change battery platform reduces electrical waste sustainably
- World premiere at the EICMA in Milan, 05 - 10 November

*Munich, 31 Oct 2019* – GOVECS together with Einhell presents an E-Kickscooter of the modern design line ELMOTO. The highlight of the ELMOTO KICK: The customer can use the scooter with Einhell's "Power X-Change" batteries, which can also be used in various other devices (tool and garden) from the same manufacturer. At the EICMA international bicycle and motorcycle trade fair in Milan, this global innovation with road approval will next week be presented to the public for the first time.

**Complete the last mile with a tool battery**

Emission-free riding, the possibility of leaving your car at home for a while, completing the last mile: with these characteristics, e-kick scooters quickly gained popularity as a new form of e-mobility. GOVECS and Einhell unite to add another innovation to this concept within their core competencies. As part of the cooperation, an e-kickscooter has been developed, in which batteries from the Einhell Power X-Change battery platform are used. Currently, the batteries already supply energy to over 100 devices in workshop and garden tools as well as in home and leisure.

"With our expertise as the leading manufacturer of electric scooters in Europe, we offer together with Einhell the climate-neutral ELMOTO KICK, which combines remarkable riding pleasure with intelligent features," says Thomas Grübel, CEO of GOVECS AG. The Power X-Change batteries are intelligent because they sustainably reduce electrical waste. "The platform expansion in this dynamic segment brings us one step closer to our vision of using Power X-Change to transport the feeling of freedom into every household with a garden," says Andreas Kroiss, CEO of Einhell Germany AG. "We are delighted to have found such a competent partner in GOVECS".

**The ELMOTO KICK: Safety Meets Performance**

With a nominal output of 300 watts, the e-kickscooter is a pioneering solution for urban mobility. Einhell's high-performance rechargeable batteries enable a legally permitted top speed of 20 km/h and a maximum range of 20 kilometres without any problems. Two 10-inch pneumatic tyres (25 cm) as well as two hydraulic disc brakes and a particularly stable frame have been installed to ensure optimal ride comfort and the highest level of safety. The LCD display shows speed and battery status in real time. The ELMOTO KICK easily handles inclinations of up to 10 degrees. To make the ELMOTO KICK even more suitable for everyday use, it weighs only 15 kilograms and has a folding handlebar with snap-in and carrying function.

### **Upcoming Premiere at the World's Largest Motorcycle Trade Fair in Milan**

The scooter can already be ordered and will be presented for the first time at the international motorcycle trade fair EICMA in Milan from 5 to 10 November. At the fair, GOVECS will also be presenting its entire product portfolio, which has already convinced customers such as Domino's or Deliveroo as well as various sharing providers. GOVECS serves the end customer market via the online shop GOVECS SCOOTER with its own electric scooters and the cult product Schwalbe, which has GOVECS electrified.

### **About GOVECS**

The GOVECS Group is the leading manufacturer of electric scooters in Europe and is developing future-oriented solutions for urban mobility. The company's success is based on high-quality "Made in Europe" products for international vehicle sharing platforms and on custom-made designs for the rapidly growing merchandise delivery segment. GOVECS is selling electric scooters and accessories to the high-growth private customer segment via its own GOVECS SCOOTER e-commerce platform. The GOVECS product portfolio currently includes e-scooters of the Schwalbe, ELMOTO LOOP, ELMOTO KICK, GOVECS PRO, and GOVECS PRO CARGO brands.
